

Fire Hose Reels – Monthly Intervals (Recommended)

Location: _____ ***Month:*** _____ ***/ 201_*** _____

Monthly Testing Instructions

- Hose is in designated position with unobstructed, visible and legible operating instructions.
- Inspect the hose reel checking for evidence of damage, corrosion, faults and obstruction.
- Look for evidence of obvious leakage in the surrounding area.
- Ensure the drum assembly is free to rotate as required.
- Record any faults and subsequent actions taken.
